PROFESSIONAL SUMMARY

Full Stack Developer with 3 years of combined experience in freelance, project-based, and onsite development roles. Skilled in building production-ready business systems using **React**, **Node.js**, **Laravel**, **Django** and other modern technologies. Experienced in developing role-based applications, RESTful APIs, and scalable backend architectures, with a focus on delivering reliable, maintainable solutions that improve operational efficiency and user experience.

CORE SKILLS

Programming Language:	Python, PHP, TypeScript, JavaScript
Libraries and Frameworks:	React.js, Next.js, Laravel, Django, Django REST Framework, Node.js, WordPress, Tailwind CSS, Bootstrap
Tools & Platforms:	Prisma ORM, n8n, Google Analytics/GA4, SEO, Claude, ChatGPT, Github Copilot
Databases:	PostgreSQL, MySQL, NoSQL, SQLite3, Supabase, Firebase
Cloud & DevOps:	AWS, Docker, Vercel, DigitalOcean, Render, CI/CD basics

EXPERIENCE

Full Stack Web Developer TinkerPro Technologies	Aug 2025 – Jan 2026 Lapu-Lapu City
- Designed and developed a scalable multi-branch POS system using React (TypeScript) and Laravel with secure authentication and RBAC, reducing checkout time by ~60% (from ~5 min to ~2 min) across branches. - Designed RESTful APIs to support real-time inventory tracking across 6–15 branches, reducing inventory discrepancies by ~30–50% and achieving near-zero manual stock count errors post-launch. - Reduced cross-branch reporting time by ~70% by centralizing reporting through optimized API endpoints, replacing a process that previously took hours. - Containerized the application with Docker, ensuring consistent environments across development and deployment and reducing manual setup overhead for staff.	
IT Support & WordPress Developer BrightWayPH	Jan 2025 – June 2025 Cagayan De Oro City
- Configured and customized a WordPress site with targeted CSS improvements, cutting page load time by ~50% and roughly doubling website traffic and applicant inquiries. - Maintained the website with regular security updates and performance monitoring, ensuring consistent uptime and protecting applicant data. - Provided technical support for hardware, software, and basic networking issues, helping sustain smooth daily operations across the team.	
Freelance Full Stack Developer	March 2024 – Present
- Developed and delivered full-stack web applications using React, Node.js, Laravel, and Django, including role-based systems, RESTful APIs, and scalable backend architectures tailored to client requirements. - Managed end-to-end development lifecycle from requirements gathering to deployment and maintenance, delivering production-ready systems focused on performance, usability, and business impact.	

PROJECTS

TinkerPro POS: Developed a modern full-stack Point of Sale system using Laravel and React (TypeScript), designed to support up to 1,000 users. Features include multi-branch sales management, real-time inventory tracking, and streamlined reporting tailored for small to medium-sized businesses. Job Request System (JRS): Built a scalable Django and React platform currently supporting 100+ active users, featuring real-time updates, role-based access control, and an intuitive interface. Improved workflow efficiency by 40% and reduced request resolution time by 60%. Happy Meter: Developed a feedback and satisfaction tracking system with 300+ active users, enabling real-time sentiment monitoring and data-driven insights for organizational improvement.
